TeamID	6ab4e346a238dc999eb5fcf4
ProjectName	**Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer**
Maximum Marks	3 Marks

TEAM ROLES

The team structure below is based on the uploaded team-member information. Suvathika R B is identified as the Project Leader, while Sahaya Anto Benin R, Muhesh M S, Mohana Arihara Sudan N M, and Ashik K are identified as Team Members.

Team Composition

Sl. No.	Team Member	Role
1	Suvathika R B	**Project Leader**
2	Sahaya Anto Benin R	Team Member
3	Muhesh M S	Team Member
4	Mohana Arihara Sudan N M	Team Member
5	Ashik K	Team Member

Project Leader – Suvathika R B

The Project Leader is responsible for coordinating the overall project activities, maintaining communication among team members, ensuring that the Flow Designer implementation follows the agreed requirements, and coordinating the final documentation and demonstration. The leader also oversees progress toward the project deliverables.

Team Members

- Sahaya Anto Benin R – supports requirement analysis, Service Catalog workflow activities, documentation, and testing.
- Muhesh M S – supports Flow Designer configuration, workflow verification, and development documentation.
- Mohana Arihara Sudan N M – supports testing, task verification, screenshots, and user guidance.
- Ashik K – supports project documentation, demonstration preparation, and verification of the completed workflow.

TEAM RESPONSIBILITIES

Project Coordination

The team works together to implement the Standard Laptop procurement automation. The Project Leader coordinates the activities, while the members contribute to analysis, configuration, testing, documentation, and demonstration. Responsibilities can overlap so that each deliverable is reviewed before submission.

Development Responsibilities

- Configure the Standard laptop task Flow Designer flow.
- Configure the Service Catalog trigger.
- Configure the Create Catalog Task action using the Requested Item.
- Set the short description to the project-specified laptop configuration description.
- Set the Assignment Group to Hardware and use the Approved condition.
- Assign the completed flow to the Standard Laptop Service Catalog item.

Testing and Verification Responsibilities

- Place a Standard Laptop order through the Service Catalog.
- Verify the request and approval information.
- Open the Requested Item and verify that the Catalog Task is generated.
- Check the task description and Hardware assignment.

Documentation and Demonstration Responsibilities

The team prepares the project report, user guidance, screenshots, and demonstration material. The final demonstration should show the complete process from Standard Laptop ordering through approval and automatic Catalog Task creation.
