ProjectName	**Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer**
Maximum Marks	3 Marks

FLOW ACTIVATION

Milestone 2 : Flow assignment

Activity 1 : Flow Assignment to Standard laptop service Catalog.

1. Open ServiceNow.
2. Click on all search for Maintain Items.
3. Select Maintain Items.
4. Under the name field search for Standard Laptop Select that record.
5. Under that record select Process engine
6. Remove the remaining automations and add Flow.
7. Add the flow that was created with the name " Standard Laptop Task".
8. Click on the menu to save the record.

Configuration Overview

After the Flow Designer configuration is completed, the Standard laptop task flow must be saved and activated so that it can execute when its trigger conditions are met.

Key Configuration Steps

- Review the Service Catalog trigger configuration.
- Review the Create Catalog Task action.
- Confirm the Requested Item input.
- Confirm the task description and Hardware assignment.
- Save the flow.
- Select Activate.
- Confirm activation when prompted.

FLOW ACTIVATION – DESCRIPTION

Implementation Details

The source screenshot displays the activation confirmation dialog. Activation makes the configured workflow available for execution when the Service Catalog trigger conditions are satisfied. This step completes the flow configuration before it is used with the Standard Laptop catalog item.

Project Context

This configuration forms part of the Standard Laptop procurement automation workflow. The project connects the Service Catalog request, approval process, Flow Designer automation, Requested Item, and generated Catalog Task to reduce manual intervention and support timely laptop configuration.

Verification

The implementation should be checked in ServiceNow after configuration. The relevant configuration should be visible, the flow should be active where applicable, and the Standard Laptop request should produce the expected Catalog Task values. The final task should reflect the configured values and assignment.

Expected Result

The configuration contributes to a streamlined procurement process in which the Standard Laptop request can progress through approval and automated task creation, with the Hardware team receiving the configuration work.
