TEST SCREENSHOTS – STANDARD LAPTOP PROCUREMENT

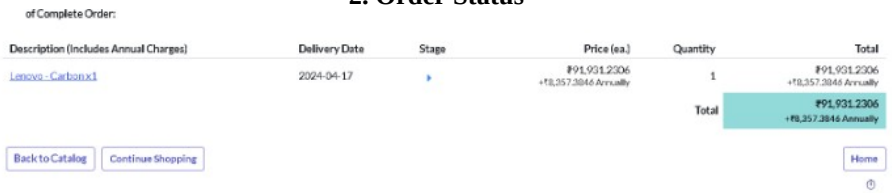

1. Standard Laptop Order

5. Now we will see the Order status
6. In that click on the Request Number

This screen shows the Standard Laptop catalog item selected for ordering. The requester reviews the item information and uses the order option to initiate the procurement request.

2. Order Status

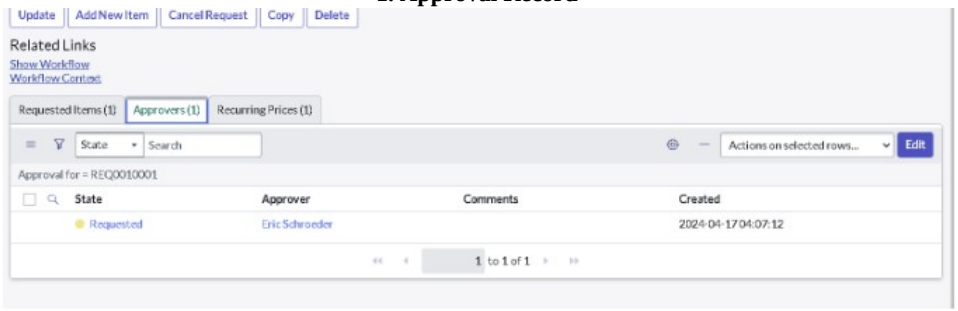

7. It will open the Requested number record.
8. Scroll down Click on the Approvers Section.

This screen shows the resulting order status and request information after the Standard Laptop order is submitted. It provides the request number and status needed for subsequent approval and verification.

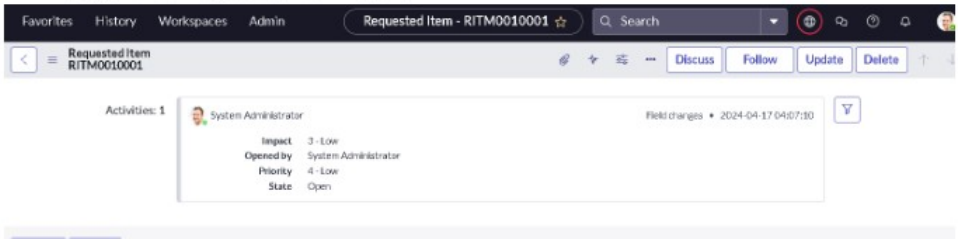

Testing Purpose: Verify that the Standard Laptop request can be placed successfully and that the generated order is made available for the next approval and fulfilment steps.

1. Approval Record

The Approvers section displays the approval record for the laptop request. The request can be approved before the Requested Item is processed.

2. Requested Item

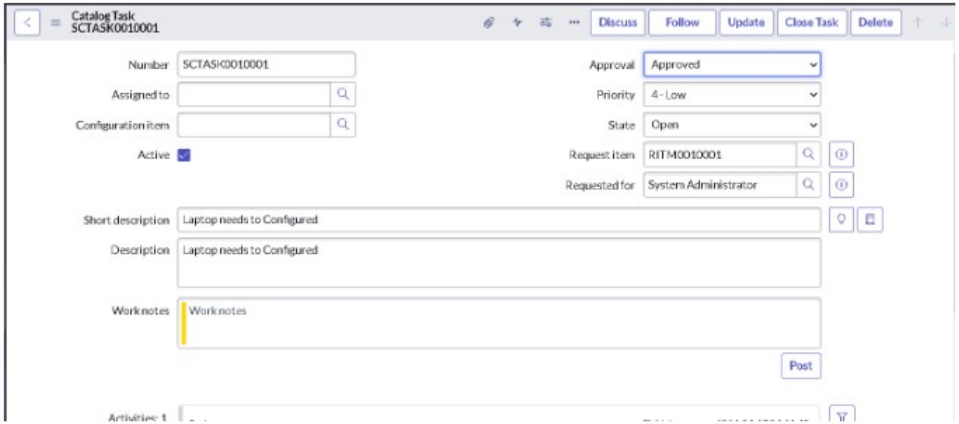

The Requested Item record is opened after approval. It provides access to the Catalog Tasks related to the Standard Laptop request.

3. Catalog Task Created

The Catalog Tasks section shows the generated task with the Hardware assignment group. This confirms that Flow Designer created the configuration task.

4. Catalog Task Status

The opened Catalog Task shows the Approved value, Open state, request item, and configured laptop description. This verifies the generated task details.
