ProjectName	**Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer**
Maximum Marks	3 Marks

PROJECT DEMONSTRATION

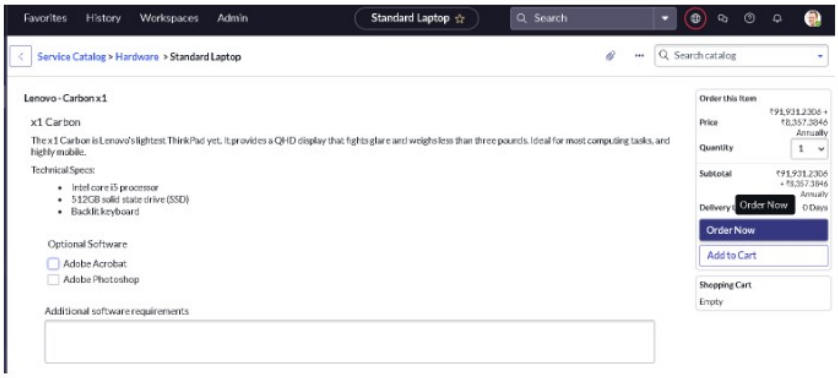

Standard Laptop Procurement Automation using ServiceNow Flow Designer

Demonstration Objective

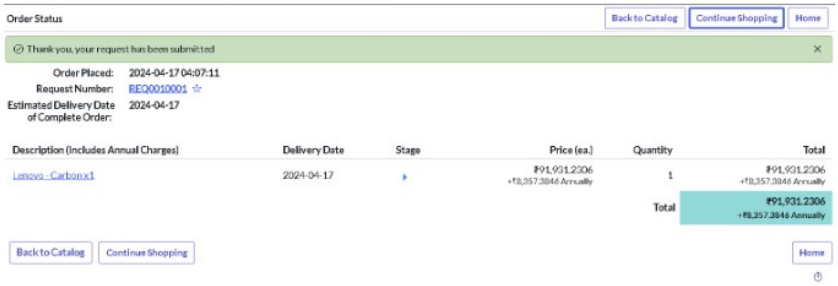

The demonstration presents the complete workflow implemented for the Standard Laptop procurement process. It shows how a user places a Standard Laptop order through the Service Catalog, how the request is processed, and how the configured Flow Designer automation supports the subsequent task-generation process.

Demo – Step 1: Open Service Catalog

Open ServiceNow and navigate to the Service Catalog. Under the Hardware category, locate the Standard Laptop catalog item. The demonstration begins by showing the item that will be used to initiate the procurement request.

5. Now we will see the Order status
6. In that click on the Request Number

7. It will open the Requested number record.
8. Scroll down Click on the Approvers Section.

Standard Laptop Service Catalog order and order-status screen

Demo – Step 2: Place the Standard Laptop Order

Select Standard Laptop and choose Order Now. After submission, the resulting order information and Request Number are displayed. The Request Number is used to continue the demonstration through approval and verification.

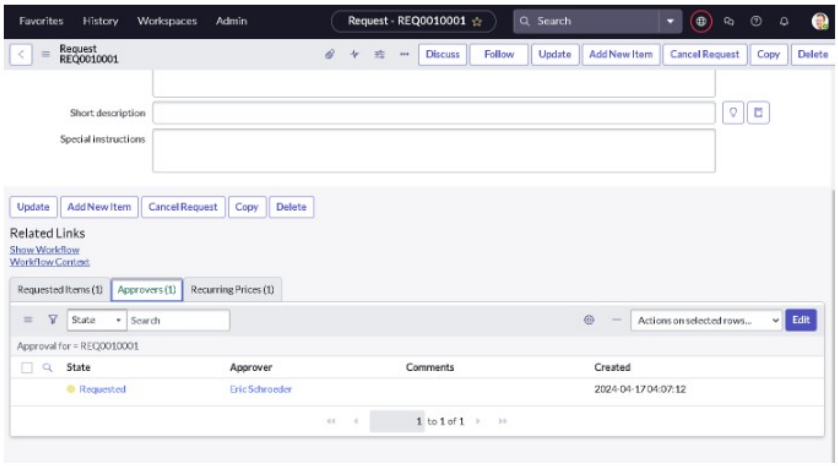

Demo – Step 3: Open the Request

- Open the displayed Request Number.
- Review the request information and locate the Approvers section.
- Continue to the approval step.

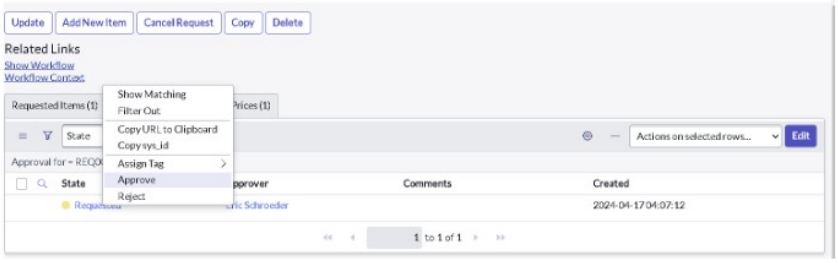

PROJECT DEMONSTRATION – APPROVAL AND TASK GENERATION

Demo – Step 4: Process Approval

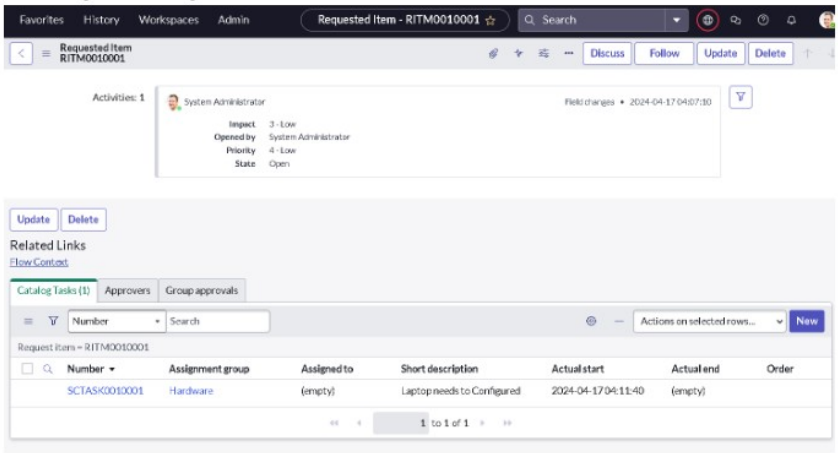

Open the Request record and scroll to the Approvers section. The demonstration shows the approval record associated with the Standard Laptop request. Approve the request so that the configured workflow can proceed.

9. Right Click on the Record to see config in that Click on the Approve.

10. Then click on the Requested item Section
11. Open that Requested Item record

Approval, Requested Item and Catalog Task verification

Demo – Step 5: Open the Requested Item

After approval, open the Requested Item associated with the request. The Requested Item provides access to the Catalog Tasks section and allows the generated task to be verified.

Demo – Step 6: Verify Catalog Task Creation

Scroll to the Catalog Tasks section and verify that the Catalog Task has been generated. The task should reflect the configuration established in the Flow Designer action, including the laptop configuration description and the Hardware assignment group.

- Verify the Catalog Task is associated with the Requested Item.

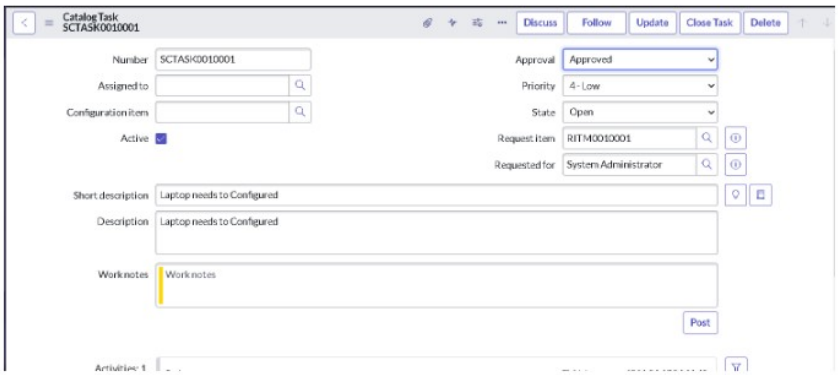

- Verify the short description is “Laptop need to Configured.”
- Verify the Assignment Group is Hardware.
- Verify the approval value is Approved.

PROJECT DEMONSTRATION – FINAL VERIFICATION

Demo – Step 7: Open the Generated Catalog Task

Open the generated Catalog Task to display the final task information. The demonstration should show the task state, approval value, Request Item, and the configured laptop task description.

12. Scroll down to the " Catalog tasks " Section
13. Open the record to see the updated status of the record with Short description and Assigned group.

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.

Demo – Step 8: Verify the Complete Workflow

The final demonstration confirms the complete sequence: Standard Laptop selection → Order submission → Request approval → Requested Item → Catalog Task creation → Hardware assignment. This sequence demonstrates the intended automation from the project.

Expected Demonstration Result

- The Standard Laptop order is successfully submitted.
- The Request Number is available for tracking.
- The approval record is processed.
- The Requested Item is available after approval.
- A Catalog Task is automatically generated.
- The generated task is assigned to Hardware.
- The configured laptop task description is displayed.

Demonstration Conclusion

The project demonstration shows how ServiceNow Flow Designer streamlines the Standard Laptop procurement process by connecting the Service Catalog request and approval process to automatic Catalog Task creation. The resulting workflow reduces manual intervention and supports timely laptop configuration.
